Tier 1 - Persona 1

Subject line: Potential partnership, SFCC / Magento, Commerce delivery capacity, Magento / SFCC support

Email 1

Dear {{firstName}},

I was researching agencies working with SFCC and Magento and noticed that {{companyName}} is active in the space.

Not sure if you're the right person to ask, but I wanted to reach out regarding potential white-label development support for commerce projects.

Bee IT is a Serbia-based commerce development partner focused on Salesforce Commerce Cloud and Magento, supporting agencies that need reliable, certified delivery capacity without expanding internal headcount.

Would you be the right person to speak with about this, or is there someone else on the delivery/partnership side you'd recommend I contact?

Best regards,

Email 2

Dear {{firstName}} {{lastName}}

Writing once more regarding potential white-label SFCC/Magento delivery support for {{companyName}}.

Not sure if this falls under your area directly, but if there's someone internally responsible for delivery partnerships or external development support, I'd appreciate it if you could point me in the right direction.

Best regards,

Email 3

Dear {{firstName}} {{lastName}},

I’ll close the loop here for now.

If SFCC or Magento delivery capacity becomes relevant at some point in the future, feel free to reach out and I’d be happy to reconnect.

Wishing you and the team all the best with the ongoing projects at {{companyName}}.

Best regards,

Tier 1 - Persona 2

Subject line: Potential partnership, SFCC / Magento, Commerce delivery capacity, Magento / SFCC support

Email 1

Dear {{firstName}} {{lastName}},

I was researching agencies working in the SFCC and Magento space and noticed {{companyName}}.

I wanted to reach out regarding a potential partnership conversation.

Bee IT is a Serbia-based commerce development partner focused on Salesforce Commerce Cloud and Magento, supporting agencies that need certified development capacity for larger or more technically demanding commerce projects.

A number of agencies we speak with are looking for ways to scale enterprise delivery capabilities without significantly increasing fixed internal overhead.

Would this be something relevant to discuss on your side, or is there someone else internally you would recommend I speak with?

Best regards

Email 2

Dear {{firstName}} {{lastName}},

Following up once more regarding my previous email.

We typically work with agencies that already have strong client relationships and strategy capabilities internally, but occasionally need additional SFCC or Magento delivery capacity to support growth or larger project scopes.

If this is handled by someone else on your side, feel free to point me in the right direction and I'll reach out directly.

Best,

Email 3

Dear {{firstName}} {{lastName}},

I'll close the loop here for now.

If it becomes relevant to expand SFCC or Magento delivery capacity in the future, feel free to reach out and I'd be happy to reconnect.

Wishing you and the team continued success with the projects at {{companyName}}.

Best regards,

Tier 2 - Persona 1

Subject line: Quick question, Potential partnership, SFCC / Magento, Commerce delivery capacity, Magento / SFCC support

Email 1

Dear {{firstName}} {{lastName}},

I was looking into agencies working on Magento and SFCC projects and noticed {{companyName}}.

Reaching out because we've been speaking with a number of ecommerce agencies that occasionally need additional development capacity when project workload starts piling up internally.

Bee IT is a Serbia-based commerce development team focused on Magento and Salesforce Commerce Cloud, usually supporting agencies on a white-label basis.

Would this be something worth a short conversation on your side?

Best regards,

Email 2

Dear {{firstName}} {{lastName}},

Following up regarding my previous email.

Bee IT typically supports ecommerce agencies that need additional Magento or SFCC delivery capacity during periods of increased project workload or growth.

If this is relevant on your side, I'd be happy to schedule a short introduction call. Otherwise, feel free to point me toward the appropriate person internally.

Best regards,

Email 3

Dear {{firstName}} {{lastName}},

I'll close the loop here for now.

Should additional Magento or SFCC delivery capacity become relevant in the future, feel free to reach out and I'd be happy to reconnect.

Best regards,

Bee IT Revised Version A

Tier 1 Persona

Best for titles like/similar:
CEO, Managing Director, Partner, Commercial Director, Growth Lead
Subject: Commerce capacity

Email 1

Hi {{firstName}},

Noticed {{companyName}} works across ecommerce and digital transformation.

Bee IT supports agencies when SFCC or Magento work is sold, but internal senior delivery capacity is tight. We have over 60 people, with more than 30 certifications, and supported agency-led commerce work for brands like GANT, Fendi Casa, Intersport, and Fuel For Fans.

Worth a short intro to see where partnership could fit?

Best regards,

Email 2

Hi {{firstName}},

One reason I think this is relevant is that we are not trying to replace your client relationship. Bee IT usually works behind the agency as delivery capacity, architecture support, or white-label engineering.

Dutch agency DEPT has worked with us for more than 5 years, and Forward, another long-term agency partner, pointed to cultural fit and reliability as key reasons the partnership works.

Should I send a few examples of how this works with agencies?

Best,

Email 3

Hi {{firstName}},
I'll close the loop after this.

If {{companyName}} ever has SFCC or Magento work where the commercial opportunity is there but delivery capacity is the constraint, Bee IT could be a useful partner to know.

Should this sit with you, or with whoever owns delivery partnerships?

Best regards,

Tier 2 Persona

Best for titles like/similar:
CTO, Delivery Director, Head of Engineering, Head of Commerce, Technical Lead
Subject: salesforce and magento delivery

Email 1

Hi {{firstName}},

Saw {{companyName}} works on e-commerce projects.

Bee IT helps agency teams cover SFCC and Magento delivery when internal engineers are booked or the project needs deeper commerce experience. Recent work includes SFRA architecture, multi-cloud Salesforce integrations, payment/logistics integrations, and Magento builds for brands like Rituals, GANT, Harman, and Paperchase.

Open to comparing where we could support your delivery team?

Best regards,

Email 2

{{firstName}} hi,

The usual fit is not “outsourcing a whole project.”

It is adding senior commerce capacity where agencies need reliable execution for SFCC backend, Magento, integrations, QA, rollout support, or maintenance. For example, Bee IT helped with multi-market SFCC work for GANT and Salesforce integrations for Rituals and Harman.

Would it make sense to map where your team sometimes gets stretched?

Kind regards,

Email 3

Hi {{firstName}},
Last note from me.

If {{companyName}} has commerce projects where delivery risk, senior capacity, or SFCC/Magento depth becomes a bottleneck, Bee IT could be useful as a quiet delivery partner behind your team.

Are you the right person for that conversation, or should I speak with someone else?

Best regards,

Bee IT Revised Version B

Subject lines

- Tier 1 Persona 1: SFCC and Magento capacity for {{companyName}}
- Tier 1 Persona 2: Partnership note for {{companyName}}
- Tier 2 Persona 1: Magento and SFCC {{companyName}} delivery

Tier 1 Persona 1: delivery or operations lead

Email 1

Hi {{firstName}},

Bee IT is the white-label commerce delivery partner behind agency builds for Rituals, Bugaboo, Gant, and Paperchase. We're Salesforce-certified, Serbia-based, and focused exclusively on SFCC and Magento engineering.

Most of our agency partners bring us in for the same reason. They keep strategy, design, and the client relationship in-house, and use Bee IT as a certified delivery capacity without growing fixed headcount. Recent examples include a full Bugaboo SFCC launch in 4 months, VidaXL's rollout to 29 countries in 6 months, and a Paperchase relaunch that lifted conversions 34% and revenue 55%.

Worth a 20-minute intro next week, or should I speak with someone else on the delivery side?

Best regards,
[Sender]

Email 2

Hi {{firstName}},
Quick follow-up on last week's note.

One thing worth flagging. The DACH agencies we speak with keep hitting the same bottleneck. SFCC and Magento engineers are scarce and expensive locally, while demand from enterprise clients keeps rising. The white-label model lets you say yes to those briefs without scrambling to hire or risking margin on subcontractors.

If that's a familiar problem at {{companyName}}, a 20-minute call is the fastest way to see if we'd be a good fit. If not, fair enough.

Best regards,

[Sender]

Email 3

Hi {{firstName}},
I'll close this out for now.

For reference, our recent agency-side work covers Rituals, Bugaboo, Gant, ASICS, Carrefour, Hartlauer, and the Mercedes F1 web store, all delivered white-label. If commerce delivery capacity becomes a question at {{companyName}} later in the year, feel free to reach back out anytime.

All the best with the work at {{companyName}}.

Best,
[Sender]

Tier 1 Persona 2: CEO, MD, or head of strategy

Email 1

Hi {{firstName}},
Reaching out about a potential partnership.

Bee IT is the engineering partner behind agency builds for Rituals, Bugaboo, Gant, ASICS, and Mercedes F1. We're Salesforce-certified and work exclusively as the SFCC and Magento delivery layer for senior digital agencies in Europe.

The pattern we see across DACH is consistent. Agencies with strong strategy, brand, and client teams don't want to carry the fixed cost of enterprise commerce engineering. The partnership lets you protect margins, take on larger briefs, and ship faster, without absorbing the headcount.

Worth a 20-minute call to see whether this maps to how {{companyName}} is set up?

Best regards,
[Sender]

Email 2

Hi {{firstName}},

Following up briefly on two examples that show the model in practice.

Bugaboo went live on SFCC in 4 months as a full-stack rebuild. VidaXL hit 29 countries in 6 months and added 4 more after that. Both projects ran with a strategy-led agency at the front and Bee IT as the build partner behind it. The agency owned the client, the brand, and the margin. We owned delivery.

If the partnership angle is worth a conversation, I'm happy to send a one-page brief and book a short call. If timing is wrong, no problem.

Best,
[Sender]

Email 3

Hi {{firstName}},
Closing the loop here.

If enterprise commerce delivery becomes a strategic question at {{companyName}} this year, I'm easy to reach. References available on request, including Rituals, Gant, Hartlauer, ASICS, and Mercedes F1.

Wishing you a strong year at {{companyName}}.

Best regards,
[Sender]

Tier 2 Persona 1: smaller or generalist agency

Email 1

Hi {{firstName}},

Bee IT works as a white-label SFCC and Magento delivery partner for European digital agencies. Recent agency-side projects include Rituals, Paperchase, and Bugaboo.

We're Salesforce-certified, and agencies typically bring us in for one of two reasons. Either growth is outpacing the local hiring market, or a specific build needs certified SFCC or Magento engineers who aren't on the bench. The engagement is sprint-based or project-based, no retainer required.

Open to a 20-minute intro to see if there's a fit?

Best regards,
[Sender]

Email 2

Hi {{firstName}},

Quick bump on my note from last week.

The Paperchase case is probably the cleanest illustration of the model. We delivered the rebuild as the engineering partner behind a strategy-led agency. Post-launch, conversions were up 34% and revenue up 55%. The same setup applies whether the brief is a full replatform or a short capacity gap.

Happy to walk through it on a 20-minute call, or send a one-pager if that's easier.

Best,
[Sender]

Email 3

Hi {{firstName}},

I'll close this out for now.

If commerce delivery capacity becomes relevant at {{companyName}} later in the year, feel free to reach back out. Happy to share case studies on Bugaboo, Paperchase, or VidaXL if useful down the line.

All the best,
[Sender]
