Campaign Blueprint for the XposeSolutions Cosmetic Dermatology initiative. Use this to guide your scriptwriting, lead research, and objection handling.

1. The Mission: "Clinical Operations, Not Marketing"

We are not an agency selling "leads." We are **Clinical Operations Partners** who install **Revenue Recovery Infrastructure.** * **The Problem (The Enemy):** The "Leaky Bucket." Cosmetic clinics spend thousands on ads but lose 75% of prospects because the front desk is too busy to answer within 5 minutes.

- **The Solution (The Hero):** An "Agentic Care Navigation" system. We build an AI "Digital Twin" of their best coordinator that handles inquiries 24/7 in the doctor's specific voice.
- **On top, (Main Product)** we optimize the patient coordination layer all the way from enquiry to booking

2. The Target: The "Clinician-CEO"

- **Specialty:** Cosmetic Dermatology / High-end Aesthetics.
- **Size:** Private practices with **2 to 5 providers** (MDs, PAs, NPs). Means 5-15 staff
- **The Vibe:** They value clinical authority and "Psychological Breathing Room." **They hate** "salesy" jargon (avoid words like *funnel, MQL, leads, conversion rate*).

3. The "Gap" Research (Your Hook)

Before you reach out, find a specific "leak." This is your "Social Signal" for a qualified meeting.

- **Response Test:** Submit a web inquiry. If they don't reply in 15 minutes, they have **Lead Decay.**
- **After Hours Check:** If their website has no "Chat" button, they are invisible to after-hours patients.
- **The Human Gap:** If they have 200+ reviews but a "broken" booking experience, they are burning reputation.

4. Language & Tone (The "Clinical Voice")

Your outreach should sound like a peer or a consultant, not a telemarketer.

DO USE	DO NOT USE
Patient Inquiries / Patient Journey	Leads / Funnel
Care Navigation / Coordination	Sales Enablement / Marketing
Clinical Infrastructure / Asset	Software / SaaS / App
Revenue Recovery	Lead Generation
"Psychological Breathing Room"	"Scaling your business"

5. High-Performance Hooks (Email/DM/Phone)

- **The "Secret Shopper" Angle:** *"I ran a stress test on your web-response and noticed a potential patient would wait [X] hours for a reply. In cosmetic derm, that's usually a lost $3,000 procedure. We help clinics plug that leak in 21 days. Do you have 10 minutes to see the blueprint?"*
- **The "Asset" Angle:** *"Most agencies 'rent' you leads. We build a permanent infrastructure in your own system that you own forever. It acts as a Digital Twin of your staff to handle the 2 a.m. triage so you can stay in the OR."*

6. Qualifying the Meeting (The $150 Checklist)

To get paid for the meeting, you must ensure:

1. **Decision Maker:** You are talking to the MD/Founder or the Practice Manager.
2. **Scale:** The clinic has 2+ providers.
3. **Proof of Pain:** You have identified one "Operational Gap" (e.g., "No instant text-back on missed calls").
   Every lead entry in Padio.io must have ONE of these notes attached:
   - ☐ **Signal A:** "They have active ads on Google AND/OR Meta but don't have a live chat feature on the website or the enquiry process is clunky."
   - ☐ **Signal B:** "Performed a secret shopper test; no response received after 1 hour."
   - ☐ **Signal C:** "Called after hours, hit the voicemail > no TEXT received in the next 1 hour"
4. **Padio Entry:** The lead is moved to the **"Discovery Booked"** stage in our CRM with your research notes attached.

7. The "Instant Disqualification" List (Do Not Book)

- ☐ **Solo-Practitioner:** Single doctor with no staff (Usually lacks the budget/scale for $30k).
- ☐ **Pure Medical:** Clinics that only do "Rashes & Moles" (Low surgical/cosmetic margins).
- ☐ **The "Old School":** If their last social media post was in 2021, they likely aren't ready for AI-driven operations.

8. Objection Handling

- **"We already have a CRM/GHL":** *"Excellent. We don't replace your GHL; we optimize it. Most clinics have a 'car' but no 'driver.' We install the AI logic and automated care paths so the system actually works for you."*

- **"We're too busy":** *"That's exactly why we're reaching out. Our system is designed to give you 'Psychological Breathing Room' by automating the triage that is currently burning out your front desk."*
