Xpose Solutions — Client Onboarding

Overview

Client: Xpose Solutions
Industry: Cosmetic Dermatology / Aesthetics / Specialty Healthcare
Offer Type: Patient Coordination Infrastructure / Revenue Recovery / Operational Optimization
Primary Goal: Book qualified discovery calls with cosmetic dermatology clinics.

This document is designed to help the campaign operator/manager fully understand:

- the client positioning,
- ICP,
- outbound strategy,
- campaign setup,
- targeting logic,
- messaging framework,
- and daily operational responsibilities.

---

1. Core Positioning

Xpose Solutions is NOT positioned as:

- a lead generation agency,
- a marketing agency,
- an AI automation agency.

The positioning is:

> "Operational revenue recovery for cosmetic clinics."

The main concept:

Most clinics already generate demand. The problem is what happens AFTER the patient inquiry.

Examples:

- slow response times,
- front desk overload,
- missed after-hours inquiries,
- poor follow-up,
- operational bottlenecks,
- lost consultation opportunities.

The messaging should always feel:

- operational,

- consultative,
- premium,
- healthcare-aware,
- non-salesy.

Avoid sounding like a generic agency.

---

2. ICP (Ideal Customer Profile)

Main Target

Cosmetic Dermatology / High-End Aesthetics Clinics.

Examples

- Cosmetic dermatology
- Med spas
- Aesthetic clinics
- Plastic surgery clinics
- Injectables clinics
- Laser clinics
- Skin rejuvenation clinics

Team Size

Best fit:

- 2–5 providers
- 5–15 employees

Avoid:

- solo practitioners,
- very small clinics,
- inactive businesses.

Geography

Primary:

- United States
- Canada
- United Kingdom
- Australia

Secondary later:

- UAE
- Switzerland
- Singapore

Important Buying Signals

High-priority leads:

- Active Meta ads
- Active Google ads
- Strong Instagram presence
- 150+ reviews
- Multiple providers
- Online booking
- Growing clinic brand

---

3. Outreach Philosophy

The campaign should NEVER sound like:

- growth hacking,
- funnels,
- SaaS,
- scaling systems,
- AI automation agency.

Instead use:

- patient coordination,
- operational infrastructure,
- revenue recovery,
- inquiry handling,
- front desk overload,
- consultation leakage.

---

4. Tier Structure

Tier 3 — Broad Campaign

Purpose

Launch immediately and validate messaging.

Personalization

Minimal:

- first name
- company name

Core Messaging

- operational bottlenecks
- missed inquiries
- front desk overload
- after-hours leakage
- patient coordination

Tier 2A — Ads-Based Personalization

Trigger

Lead runs:

- Meta Ads OR

- Google Ads

Angle

"You already invest in patient acquisition."

Core idea:

- clinics already generate demand,
- issue is operational conversion,
- response speed,
- follow-up,
- coordination layer.

Tier 2B — Website Friction Personalization

Trigger

- no live chat,
- weak booking flow,
- traditional inquiry forms,
- no instant response mechanism.

Angle

"Modern cosmetic patients expect immediate coordination."

Tier 1 — Manual Personalization

Reserved only for:

- premium clinics,
- multi-location groups,
- highest-value accounts.

Possible actions:

- booking flow review,
- after-hours check,
- secret shopper test,
- Loom audit.

This is NOT automated initially.

---

5. Current Campaign Rollout Plan

Week 1

Launch Tier 3 campaigns.

Focus:

- infrastructure setup,
- sending reputation,
- inbox health,
- response data.

Week 2–3

Add Tier 2 personalization:

- Meta ads detection,
- Google ads detection,
- website friction signals.

Week 4+

Evaluate:

- best-performing messaging,
- positive reply rates,
- meeting quality,
- possibility of Tier 1 personalization.

---

6. Messaging Rules

NEVER USE

- funnel
- MQL
- growth hacking
- scale your business
- AI automation agency
- SaaS platform
- lead generation agency

Preferred Language

- patient coordination
- operational infrastructure
- consultation leakage
- front desk overload
- after-hours inquiries
- response time
- revenue recovery
- inquiry handling

---

7. Current Tier 3 Email Sequence

Email 1A

Subject: A different approach than lead generation

Most agencies focus on generating more patient inquiries.

What we often see in cosmetic clinics is that the bigger issue is what happens after the inquiry comes in.

Xpose helps clinics build a permanent patient coordination infrastructure inside their existing systems so inquiries are captured, followed up, and converted more consistently without adding pressure to the front desk team.

The goal is not more leads. It is recovering the revenue already being missed operationally.

Happy to show you the operational gaps we typically uncover in cosmetic dermatology clinics if useful.

Email 1B

Subject: Patient inquiry coordination

A lot of cosmetic clinics are already generating strong patient demand.

The bigger issue is usually what happens between the inquiry and the booked consultation: delayed response times, front-desk overload, and missed after-hours opportunities.

Xpose helps clinics improve that coordination layer without replacing their existing systems.

Happy to show you the operational gaps we typically uncover in cosmetic dermatology clinics if useful.

Email 2

Subject: Re: patient coordination

One thing many cosmetic clinics underestimate is how expensive delayed follow-up can become.

In aesthetics, even a missed consultation request can easily mean a lost multi-thousand-dollar procedure.

Most practices do not actually have a demand problem. They have a coordination and response-time problem.

Xpose focuses specifically on fixing that operational layer.

Email 3

Subject: Re: patient coordination

What usually happens as cosmetic clinics grow is that the front desk becomes the operational bottleneck long before patient demand slows down.

Calls, web inquiries, scheduling, follow-ups, after-hours requests — everything ends up flowing through the same small team.

That is typically where patient leakage starts to happen quietly.

Happy to share how clinics are solving this without adding more operational chaos.

---

8. Campaign Manager Responsibilities

Daily

- Monitor inbox health
- Monitor reply rates
- Monitor spam issues
- Track positive replies
- Track booked meetings
- Pause underperforming inboxes
- Remove bad leads
- Check deliverability

Weekly

- Analyze best-performing subject lines
- Analyze best-performing email variation
- Improve lead quality
- Add new targeting filters
- Add personalization layers
- Optimize sending volume

---

9. Recommended KPIs

Early Stage

Focus primarily on:

- Open Rate
- Positive Reply Rate
- Interested Reply Rate
- Meetings Booked

Benchmark Targets

Positive reply rate:

- 1–4%

Meeting booking rate:

- depends heavily on lead quality.

---

10. Suggested Tool Stack

Sending

- Smartlead

Lead Source

- Apollo
- Clay

Tier 2 Signals

- Meta ads detection
- Google ads detection
- Review count
- Website analysis
- Live chat detection

• Online booking sistem

---

11. Important Notes

The goal is NOT to sound like a marketing agency.

The goal is to sound like:

- an operational partner,
- a healthcare infrastructure consultant,
- a clinic operations specialist.

The tone should always feel:

- calm,
- intelligent,
- premium,
- non-aggressive.

Avoid hype language and AI buzzwords.

The strongest positioning:

"Most clinics do not have a demand problem. They have a patient coordination problem."
